FAQs & more

FIRST TIME SETUP: BLUETOOTH PAIRING

- 1 Turn on the Bluetooth in your device settings.

- 2 When the Studio Pro Wireless Headphones are powered off, press and hold the Power Button for approximately 8 seconds.

Fast blinking red and blue light indicates searching for Bluetooth device.

- 3 Select "JLab Studio Pro" in your device settings to connect.

When the headphones are paired, voice prompts "You are connected" and blue light will flash slowly.

PAIRING NEW / ADDITIONAL DEVICES:

Turn OFF Bluetooth on your previously paired device and turn ON Bluetooth on new device. Repeat **FIRST TIME SETUP** process for new devices.

Notes:

- Bluetooth is a wireless radio technology, which means it is sensitive to objects between the headphone and the connected device. The headphone is designed to be used within 33 feet (10 meters) of a connected device, with no major objects in between (walls, etc.).
- Once successfully connected, the headphone will memorize your device and automatically pair when turned on in the future. Only one device may be connected at a time. To pair a different device, first unpair the current one through its Bluetooth settings.
- If for any reason Bluetooth connection is lost, manually reconnect your Bluetooth device.

BUTTON FUNCTIONS

VOLUME UP: Click once

TRACK FORWARD:
Click & hold 2+ seconds

VOLUME DOWN: Click once

TRACK BACKWARD:
Click & hold 2+ seconds

POWER ON / OFF:

with amplified vocals and bass

BALANCED
(Two Beeps)

Even sound with no additional
sound enhancements

BASS BOOST
(Three Beeps)

Amplified bass and sub-bass

CHARGING

Connect the USB Type C charging cable (included) to the headphone and connect to a computer or USB 5v/1amp output device (not included). Make sure the USB connection has a power output source.

Solid red light indicates the headphone is charging.

Solid blue light indicates charging is complete.

CAUTIONS

- Avoid getting moisture or liquids on the headphone cups.
- Avoid extreme heat, cold, and humidity.
- Avoid dropping or crushing headphones, stressing the cable by rapid pulling or extreme force, or bending the cable at a sharp angle.
- Wax may build up in headphone cups, lowering the sound quality. Carefully remove the wax with a cotton swab or other small tool to improve the sound quality.
- If you experience discomfort or pain, try lowering the volume or discontinuing use temporarily.
- If you experience regular discomfort while using this product, discontinue use and consult your physician.
- We recommend you treat your headphones as you would a nice pair of sunglasses and keep them in safe location when not in use.
